

Modultek newsletter 06/2006

Wednesday June 7th, 2006

In this issue:

- **Kemppi – the Joy of Welding**
- **Finnish CAE/PLM market 2005**
- **Modultek's New Look**

Kemppi– the Joy of Welding

Since its foundation in year 1949, Kemppi Oy has been a private, family-owned company, having its basis in entrepreneurship. Today, it is an international company with global operations, still having its head office and manufacturing facilities in Finland.

From the very beginning, Kemppi has been a pioneer in developing and manufacturing welding machines. Also today, Kemppi leads the way to the future welding technology.

Kemppi has acquired Aton PDM from Modultek. Aton has been integrated to Kemppi's erp-system IFS. Aton is managing all engineering documents and working as corporate Item Master, so all Kemppi's new Items are founded in Aton.

Finnish CAE/PLM-market 2005

The CAD/CAM Association of Finland (CCY) has charted the present state of the Finnish CAE/PLM market. The results were published in the 2/2006 issue of Valokynä magazine.

The survey was targeted at actual software users. PDM and PLM was considered widely and included also Document Management and more. Though there was a big diversity of softwares in the survey, Modultek's Aton gained the clear market leading position among companies using PDM/PLM.

The survey has previously been conducted in 1999 and 2005, and Modultek has been the market leader in all surveys. We are proud and happy of this achievement, and keep on working to serve our customers with the best possible solutions.

Modultek's New Look

Modultek's visual image has been renewed. Last time we had a "face lift" in year 2000, together with launching our new generation PDM/PLM software Aton.

With the new look we wish to emphasize a start of a new era in Modultek. Along with the recent MBO in the company we have strong faith in the future. Almost 20 years of experience in PDM/PLM business and the fact that we have held the market leading position almost as long as the company has existed, both tells about our extreme professionalism and reliability.
